--------------	--	---------------------

NOTE: This is a rough estimate; there's a possibility the total amount falls below OR slightly above this (due to changes in exchange rate and others).

With this table, this should be raised within **14 months** from the start of the whole process.

You don't need to have all the cash at once to start, but a good financial plan using your monthly income with this guide on the deadline payment of each stage would get you on that American dream as a self-sponsored nurse comfortably.
